Education

Canara Engineering College — Mangalore, Karnataka
B.E. in Computer Science and Engineering (CGPA: 8.45/10) — *2023 - 2027*

Govt. HSS Paravanadukkam — Kasaragod, Kerala
Higher Secondary (PCMB) – 92.7% — *2021 – 2023*

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, C, SQL
Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
Backend: Node.js, Express.js, FastAPI, Spring Boot, JWT Authentication
Databases & ORMs: PostgreSQL, MongoDB, Prisma, Hibernate
Tools: Git, GitHub, Docker, Postman, Cloudinary, VS Code

Projects

Intelligent Adaptive Fleet-Level OTA Deployment Framework (FOTA) | *Next.js, FastAPI, PostgreSQL* GitHub

- Engineered an IoT OTA platform to manage vehicle TCU devices and firmware updates remotely
- Implemented adaptive rollouts that dynamically adjust batch sizes based on update failure rates
- Developed a real-time fleet dashboard to monitor device health, update progress, failures, and rollbacks.

NGO Volunteer Management System | *React.js, FastAPI, MongoDB* GitHub

- Developed a full-stack platform connecting NGOs with volunteers, supporting campaign creation, volunteer participation requests, and **automated e-certificate generation**.
- Implemented role-based access control (RBAC) for NGO, Admin, and Volunteer roles, securing **[N]+** REST API endpoints with permission checks.
- Crafted the React.js frontend and FastAPI REST APIs while leveraging MongoDB to manage campaign, user, and volunteer participation data

Dev-Studio – 3D Printing Inventory Platform | *React.js, Node.js, Express.js, MongoDB, Cloudinary* GitHub | Live

- Built a secure MERN-stack application to manage 3D-printing inventory, with JWT authentication and scalable REST APIs.
- Designed a responsive React and Tailwind UI using TanStack Query for data caching and state synchronisation, with dynamic theme switching.
- Implemented a drag-and-drop media pipeline with the Cloudinary API to upload, preview, and link multiple high-resolution product images to MongoDB records.

Brainly – Second Brain | *React.js, Node.js, Express.js, MongoDB* GitHub | Live

- Created a personal knowledge management application that allows users to save, organize, and manage notes and links through complete CRUD functionality.
- Developed a responsive React.js frontend seamlessly integrated with Express.js REST APIs.
- Utilized MongoDB to persist and retrieve user-generated content with high reliability.

Achievements

- **LeetCode:** Solved **800+** DSA problems; peak contest rating of **1521**.
- **CodeChef:** Contest rating of **1144**.
- **Finalist** in the Code Venture and Blind Coding competitions at Canara Engineering College.

Courses & Certifications

- **TLE Eliminators (TLE 12.0)** – Level 3, competitive programming and advanced algorithms.
- **Full Stack Development (100xDevs)**: Completed Comprehensive Full Stack Development and Dev-Ops courses on 100xDevs by Harkirat, covering frontend and backend technologies and deployment.
